Non-Approved Substances

What are they?
Any pharmacological substance which is not addressed by any of the subsequent sections of the list and with no current approval by any governmental regulatory health authority for human therapeutic use (e.g. drugs under pre clinical or clinical development or discontinued, designer drugs, veterinary medicines) is prohibited at all times.

Status on the prohibited list
Comes under category S0 on the list of substances and methods prohibited at all times (In and Out of Competition).

Side Effects of non-approved substances:
Due to the non-approved status of the substance(s), the side effects are difficult to isolate and could vary from individual to individual.
